Effects of Ride-Sharing Employment on Educational Outcomes:

Balancing Work and Study for
Private University Student Drivers in Dhaka

The Rising Trend of Student Gig-workers

SOURCE:

Problem Statement:

There is limited understanding of how ride-sharing employment affects the academic performance of private university students in Dhaka, especially given the unique flexibility and demands of gig work compared to traditional part-time jobs.

Literature Review Discussion

Working more than this can cause significant loss in academic performance

BASED ON:

Gig Work & College Students: An Analysis of the Student Employment Experience

By Lauren Andriaansen

source:

digitalcommons.bryant.edu/cgi/viewcontent.cgi?article=1000&context=honors_politicslawsociety

Research Hypothesis

Students who work more than 5 hours per day in ride-sharing exhibit significantly lower academic performance due to increased stress and reduced study time.

Research Objectives:

- 1.** To examine the relationship between ride-sharing work hours and students' academic performance
- 2.** To assess whether engagement in ride-sharing delays or hinders graduation
- 3.** To estimate the short-term and long-term academic and financial trade-offs of participating in ride-sharing work

Data Collection

40

Participants
[All Student Drivers]

15

Private
Universities

03

Locations
[Across Dhaka City]

Reasons for Ride-sharing work

Category	Specific Reasons	Frequency	Percentage
Tuition & Academic Fees	Tuition Fees, Postgrad Exam Fees, Textbook Costs, Study Tour Fees	20	50%
Living Expenses	Living Costs, Student Housing/Rent	6	15%
Income Generation	Part-Time Job, Freelancing	3	7.50%
Savings & Funds	Savings, Travel Abroad Fund, Emergency Funds	2	5%
Family & Emergencies	Family Emergency, Family Support	2	5%
Debt & Loans	Loan Repayment, Debt Clearance	2	5%
Skill Development	Skill Development	2	5%
Medical Costs	Medical Bills	2	5%
Miscellaneous	Startup Capital	1	2.50%

Reasons for Ride-sharing work

Students' Education Expenditure as a % of Earnings

Income is represented as a monthly basis

Students' Education Expenditure as a % of Earnings

KEY TRENDS:

LOW INCOME SPENDS 50%+

MIDDLE INCOME SPEND 40%+

HIGHER INCOME SPEND 30%

Distribution of Student Work Hours

43%

Worked longer
than 5 hours

57%

Worked 5 hours
or less

[When they were engaging in
providing Ride-sharing service]

Grade Drop Severity by Work Hours

Group	Severe Drops	Non-Severe Drops	No Change
>5 Hours	94%	6%	0%
≤5 Hours	9%	30%	61%

Grade Drop Severity by Work Hours

> 5 Hours Group

≤ 5 Hours Group

Academic Absenteeism (> 5 hours vs. ≤ 5 hours)

Work Hours	Total Students	Students Missing Classes/Exams	% std. miss cls.
> 5 hours	17	17	100%
≤ 5 hours	23	6	26.10%

Health Impact Comparison

(> 5 hours vs. ≤ 5 hours)

Metric	>5 Hours Group	≤5 Hours Group
Total Participants	17	23
Participants with Health Issues	17 (100%)	10 (43.5%)
Total Health Issues	17	10

Students working >5 Hours

2.3x [times]

more likely to experience Health Issues

A Case for Possible Long-term Financial Losses

$$GPA(H) \downarrow \Rightarrow T(GPA) \uparrow \Rightarrow D = C \times S$$

Where,

H: The total weekly hours worked in ride-sharing

GPA(H): GPA, which is assumed to be a negative function of H

T(GPA): Graduation time, which is assumed to increase as GPA declines ($\uparrow$)

D: additional tuition fees due to delayed graduation

C: Cost per semester course

S: additional semester(s) needed due to GPA decline

$$NPV = (I \times n) - [(D + W \times m) \times (1 + r)^m]$$

Where,

NPV: Net Present Value of the ride-sharing decision

I: monthly income generated from ride-sharing

n: number of months worked

D: additional tuition cost

W: monthly wage from a post-graduation career

m: number of months of delayed entry into full-time employment

r: discount rate representing the time value of money

$$DR = \frac{D + W \times m}{I \times n}$$

Where:

DR: Destruction Ratio, defined as the ratio of future financial loss to present income

Possible Long-term Financial Loss Represented through a Flowchart

Potential Academic Dropout (> 5 hours vs. ≤ 5 hours)

Group	Considered Dropping Out	Total Participants
>5 Hours	16	17
≤ 5 Hours	1	23

Students working >5 hours daily are

23x [times]

more likely to consider dropping out
